Professional Summary

- With 4 years of experience in full-stack web development, I am proficient in building and optimizing applications using React.js, Node.js, TypeScript, and MySQL/PostgreSQL/MongoDB.
- Skilled in developing responsive, user-centric interfaces, enhancing mobile engagement, and improving application performance to drive user interaction and system efficiency
- Expertise in creating scalable server-side logic and APIs using Node.js, Axios, and Express, while optimizing databases and ensuring seamless application functionality
- Strong background in QA testing, collaborating with cross-functional teams to identify critical defects and ensure high-quality releases, improving overall system reliability
- Extensive experience in IT infrastructure management, including network security, troubleshooting complex technical issues, and improving system uptime
- Proven track record in ERP system deployment, data management, and providing IT support, driving operational efficiency, reducing manual tasks, and improving team performance

Skills

- | | |
|---|--------------------------|
| • Web Development (React JS, Express JS, Node JS, HTML & HTML5, CSS Proficiency, Responsive Web Design) | • Server-Side Logic |
| • UI/UX Design (Requirements Analysis, SEO) | • Data Management |
| • API Integration (RESTful APIs Development, Axios) | • Backup Systems |
| • JavaScript Programming (JavaScript, TypeScript, C++/C#, Object-Oriented Programming) | • Functional Testing |
| • Database Design (PostgreSQL, MySQL, MongoDB) | • Performance Testing |
| • Testing & Quality Assurance (Jasmine, Test Planning) | • Manual Testing |
| • Game Development (Unreal Engine 5, Blueprint Scripting, C++, Game Mechanics, Level Design) | • Test Case Design |
| • ERP Systems (ERP Next) | • Defect Resolution |
| • Back-End Integration | • Data Analysis |
| • Solidity (Blockchain) | • Excel Proficiency |
| | • Automated Reporting |
| | • IT Hardware Management |
| | • Network Security |
| | • Communication |
| | • Problem Solving |

Work Experience

Full Stack Developer

Transcends Systems East Africa Ltd (TSEA)

January 2022 – Present

- Build and optimize web applications using front-end and back-end tools, achieving a 30% boost in application efficiency and cutting load times by 20%
- Partner with design teams to deliver user-centric, visually appealing interfaces, significantly enhancing user satisfaction metrics by 75%
- Implement responsive and feature-rich user interfaces with React JS, driving a 15% rise in engagement among mobile users

- Develop reusable and efficient JavaScript and TypeScript components, reducing bug reports by 40% through robust client-side functionality
- Construct and maintain server-side APIs and logic using Node.js, Axios, and Express, effectively supporting a 50% growth in user activity without service interruptions
- Write clean, maintainable HTML and CSS to produce layouts with a 30% faster rendering speed, improving the overall user experience
- Integrate and optimize MySQL and PostgreSQL databases, enhancing query efficiency and achieving a 35% improvement in performance
- Deploy ERP Next systems for various clients, increasing operational efficiency by 40% and reducing manual tasks by 25%

Software Tester (Freelance)

Testlio

July 2022 - December 2022

- Worked with cross-functional teams to conduct manual and exploratory testing on Snapchat, increasing defect detection by 30%
- Ran test cases, documented defects, and validated bug fixes on the Testlios platform, reducing defect resolution time by 25%
- Contributed to the development of test plans, creation of test cases, and execution of regression tests, leading to a 20% reduction in production bugs
- Enhanced testing processes by providing valuable feedback on test cases, resulting in a 15% increase in test coverage
- Reported testing outcomes and progress to project managers, ensuring on-time project completion and reducing delays by 20%
- Conducted detailed functional and performance testing, identifying critical issues that improved overall system reliability by 30%
- Coordinated with developers to ensure that defect fixes were aligned with project timelines, reducing rework by 20% and maintaining project flow
- Analyzed test results and worked with the QA team to prioritize high-impact defects, improving system stability by 25%

Data Entry

Jubilee Insurance Alliance

December 2021 – January 2023

- Processed claim form data in Excel with 99% accuracy, reducing claims processing time by 20%
- Analyzed data sets in Excel to uncover trends and patterns, providing actionable insights that improved operational efficiency by 15%
- Managed large volumes of data, ensuring precise entry and validation, which enhanced data integrity and reduced errors by 10%
- Collaborated with cross-functional teams to streamline data workflows, optimizing the overall processing pipeline, leading to a 25% improvement in turnaround time
- Produced detailed reports and visualizations that supported decision-making and boosted department performance by 20%
- Developed and maintained automated Excel templates, reducing manual data entry time by 30% and improving accuracy
- Identified data discrepancies and inconsistencies, resolving issues that resulted in a 40% improvement in data quality
- Provided training and guidance to team members on data management best practices, enhancing overall team efficiency and reducing errors by 15%

Network Administrator (Attachment)

- Diagnosed and resolved network issues, enhancing network reliability and cutting issue resolution time by 40%
- Oversaw the management of IT hardware, software, and systems, boosting overall system uptime and operational dependability by 20%
- Supported data center operations, optimizing infrastructure to ensure uninterrupted performance and minimizing downtime by 15%
- Managed network security devices, safeguarding the organization's network and reducing security incidents by 25%
- Installed and configured key communication and security systems, such as VoIP phones, PBX, CCTV, access control, and video conferencing, improving operational efficiency by 30%
- Delivered IT training and user support, raising employee technical skills and reducing support ticket volume by 20%
- Maintained organized network infrastructure and cabling, improving network stability and performance by 10%

Education

Bachelor of Science in Computer Science

United States International University - Africa

2017 - 2021

Kenya Certificate of Secondary Education

Mukaa Boys' High School

2013 – 2016

Professional Trainings

C++ Nanodegree

Udacity

Completed

Full Stack JavaScript developer

Udacity

Ongoing

Web Development Bootcamp

Udemy
